US MASTERBATCH is a Manufacturer of CaCO₃ Filler Masterbatch/ Color Masterbatch & Additives Masterbatch

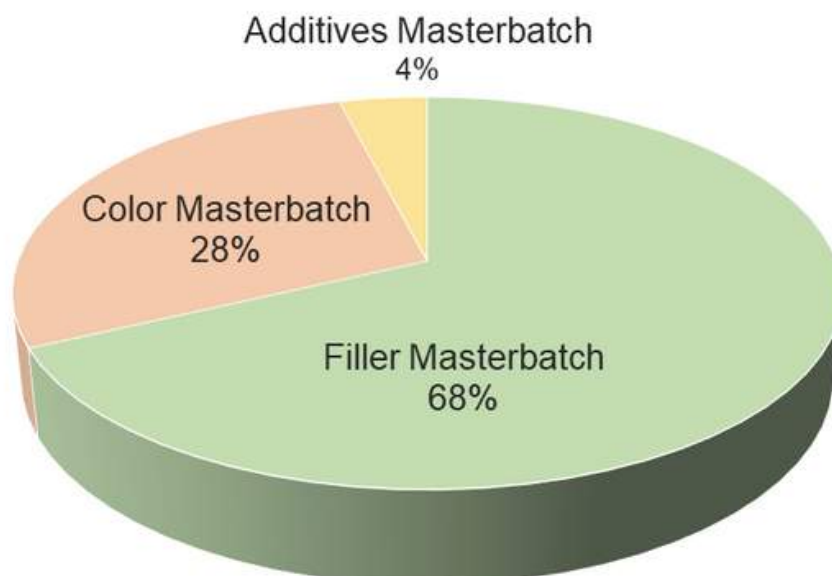

Factory 1:

Tien Xuan Commune, Thach That District,
Hanoi City, Vietnam

Factory 2:

Lot CN05, Industrial Area Minh Quang,
My Hao District, Hung Yen Province, Vietnam

Market Share Of Each Product

OUR FACTORY

Owning two factories in Hanoi capital of Vietnam, US Masterbatch is confidently located at the center of Southeast Asia - an extremely favourable geographical export position.

Besides, Vietnam is famous for ultra-fine high-quality CaCO₃ source which play an important part in the production of Masterbatch. Abundant reserves and the world-class quality of CaCO₃ contribute to the excellent Masterbatch we are distributing.

Inheriting many advantages on the location and input materials, US Masterbatch respectfully contributes our know-how accumulated experiences into the production of Plastic Masterbatch.

We are highly committed to our esteemed customers on product quality, pricing and services.

OUR FACTORY

IMPLEMENT OF INNOVATIVE TECHNOLOGY

With over 10 research professionals working to constantly research & develop to meet all customer requirements.

Where quality is controlled under international standard ensuring high quality of both input and output materials

OUR FACTORY

SYNCHRONIZED PRODUCTION PROCESS

1.High Quality Input Materials

2.Machine Operation

3.Packaging

4.Quality Testing

5.Delivery

OUR FACTORY

INTERNATIONAL MANUFACTURING STANDARDS

US MASTERBATCH takes it upon ourselves to add value to our customers' business with products of the highest quality, guaranteed by a certified Quality Control System according to UNI EN ISO 9001:2015.

Our products have achieved international quality certifications: by REACH, FDA by SGS, and TÜV RHEINLAND. These are the leading requirements to meet export standards to fastidious markets such as Europe and the United States of American.

PRODUCT

MASTERCOLOR COLOR MASTERBATCH

Color Masterbatch helps adding color to plastics. Mastercolor at US Masterbatch are customized all colors with excellent light-fastness, heat resistance and good dispersibility applied to end plastic applications.

MASTERFILL FILLER MASTERBATCH

CaCO₃ Filler Masterbatch contains mainly calcium carbonate compounding with polymer resin and dispersion aids. Masterfill is used to replace one of part virgin resin that helps saving cost for the end products and improving some properties such as whiteness, hardness, strength.

MASTER MODIFY ADDITIVES MASTERBATCH

Additive Masterbatch consists of one or more additives and a specific polymer resin which is a one of the most ideal materials in thermoplastic industry.

Our Master Modify includes Antistatic, Antiblock, Slip, Anti UV and so on.

APPLICATION

Our Masterbatch is widely used as one of the most popular materials in plastic manufacturing process.
