Who we are?

History of Alwero commenced in 1999 with the idea for shared future conceived by two young people. Quite soon we put this idea for life into practice by setting up a company and a family.

Over the years of our business activities we have gained knowledge and experience in the field of wool - the basic raw material used by us, placing a particular emphasis on the needs of our customers.

We are incessantly driven by the wish to give people a chance to take advantage of the benefits wool carries.

At present we offer the widest in Europe range of products made of pure sheep wool.

We are the brand identified with nature and natural products addressed to people living in harmony with nature.

You are invited to the world of wool - our world!
